

Printing on Linux

Before setting up your printers, please review the overview of [Printing at ICERM](#).

The following instructions assume you are connected to the Brown University network via [wireless](#) (Brown, Brown-Guest, or eduroam).

Setup Instructions

1. Open the New Printer dialog, and select **Network Printer** → **LPD/LPR**.
2. Enter the hostname of the printer you wish to add, then click “Forward”.
 - 11th Floor Copier: **icerm-im3500.devices.brown.edu**
 - 10th Floor LaserJet A: **icerm-ljem610a.devices.brown.edu**
 - 10th Floor LaserJet B: **icerm-ljem610b.devices.brown.edu**
3. The OS may detect the printer software. If not, search for **HP LaserJet Enterprise M610** for the 10th floor printers or **Ricoh IM3500** for the 11th Floor Copier. If your system does not have these drivers installed, you may use the **Generic PostScript Printer** drivers.
4. All printers support duplexing (two-sided printing).

If you have questions about these instructions or require further assistance, please contact the ICERM IT staff by dropping by the administrative offices or emailing support@icerm.brown.edu.
