

Open OnDemand Access to Oscar

Open OnDemand (OOD) is a web portal to the Oscar computing cluster. **An Oscar account is required to access Open OnDemand**. Visit this [link](#) in a web browser and sign in with your Brown username and password to access this portal.

Benefits of OOD:

- No installation needed. Just use your favorite browser!
- No need to enter your password again. SSH into Oscar in seconds!
- No need to use two-factor authentication multiple times. Just do it once, when you log into OOD.
- Use it with, or without, VPN. Your workflow remains the same.
- Just a good time over all ☐☐

Once logged in you'll see a landing page that looks similar to the photo below:

OPEN

OnDemand

OnDemand provides an integrated, single access point for all of your HPC resources.
