

Oscar: Magma

Loading and launching Magma

1. Once authenticated to Oscar, use the following commands at the command line.
2. Magma requires a GPU partition. Start an interactive node by commanding `interact -q gpu` (if running Oscar in PuTTY, pasting text is done by right-clicking).
3. To load Magma, use `module load magma-usyd/V2.28-8-p3zylpg`.
4. Use `magma` to launch the Magma console.
