

# Oscar: Mathematica

## Loading and Launching Mathematica

1. Open the Terminal and use the following commands at the command line.
2. Start an interactive job by using the `interact` command. This command can take [additional parameters](#) to extend the resources and time allotted to the node as well as the partition that the node operates on.
3. Command `module avail mathematica` to list all the available Mathematica versions (if running Oscar in PuTTY, pasting text is done by right-clicking).
4. Command `module load mathematica` to load the latest Mathematica version.
5. Command `mathematica` to launch the Mathematica app.
