

Oscar: Mathematica

Loading and Launching Mathematica

1. Open the Terminal and use the following commands at the command line.
2. Start an interactive job by using the interact command. This command can take additional parameters to extend the resources and time allotted to the node as well as the partition that the node operates on.
3. Command `module avail mathematica` to list all the available Mathematica versions.
4. Command `module load mathematica` to load the latest Mathematica version.
5. Command `mathematica` to launch the Mathematica app.
